Application/Control Number: 09/622,218

Art Unit: 3753

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

first species of Figs. 1-2, second species of Figs. 3-4, third species of Figs. 5-6, fourth species of Figs. 7-8, fifth species of Figs. 9-10, sixth species of Fig. 11, seventh species of Fig. 12, eighth species of Figs. 14-16, ninth species of Figs. 17-18, tenth species of Fig. 19, eleventh species of Fig. 20, twelfth species of Fig. 21, thirteenth species of Fig. 22, fourteenth species of Figs. 23-24, fifteenth species of Fig. 25, sixteenth species of Figs. 26-30, seventeenth species of Figs. 31-32, eighteenth species of Fig. 33 and, nineteenth species of Fig. 34

In the event Figures 6, 8, 10, 11, or 12 is elected please elect either a cylindrical jet aperture as shown in each of these drawings or the modified aperture shown in Figure 13 (as describe in the paragraph spanning pages 24-25 of the specification).

In the event the sixteenth species of Figures 26-30 is elected, choose <u>one</u> of baffle arrangements shown in Figures 27-30, respectively.

In the event the seventeenth species of Figs. 31-32 is elected, choose <u>one</u> of the baffle arrangements shown in Figure 31 and Figure 32, respectively.

In the event the eighteenth or nineteenth species is elected, choose <u>one</u> of the first through seventeenth species identified above, and in event of a choice of a species having alternative constructions, as identified above <u>one</u> of those alternative constructions.

Application/Control Number: 09/622,218

Art Unit: 3753

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: regarding the PCT rules, it is noted that claims 14 and 24 are the broadest claims in the application and the special technical features shared, in common, are simply a support plate with a cavity behind it. Much of the prior art supplied by applicant on September 14, 2000, shows that much: e.g. JP 7-263528 (Fig 8) among others. Therefore, under the applicable PCT rules an election of species is a proper requirement.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Application/Control Number: 09/622,218 Page 4

Art Unit: 3753

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to John Ford at telephone number (703) 308-2636.
